This design shows a battery ready PWRcell system in a traditional net-metering configuration sourced by PV power. There are DC inputs available for additional PV or to add battery storage in the future.

This configuration is acceptable for use with 200A or larger utility services.

Grid Connected / Battery Ready [1111-01]

- 1 PWRcell Inverter
- 3 PV Links (max. 6)
- 1 CT Kit (included)
