

This design shows a PWRcell system configured with an on-site generator. This design isolates the generator from the inverter and involves a line-side tap and two transfer switches. The inverter output supports a loads panel that can also be transferred to the generator.

This configuration is acceptable with most utility services.

On Site Generator / Solar + Storage [231B-01]

- 1 PWRcell Inverter
- 6 PV Links
- 2 PWRcell Batteries
- 1 CT Kit (included)
