This design shows a Pika Energy Island with a revenue grade meter (RGM) connected. Use this system configuration to provide backup power to a Protected Loads Panel (12 kW surge, 8 kW continuous).

This configuration is acceptable with most 200A residential services.

RGM with Protected Loads / Solar + Storage [1318-02]

- 3 PV Links
- 1 Islanding Inverter
- 1 Pika Smart Battery
- 1 REbus Beacon
- 1 CT Kit
